

# PitStop Gear – F1 Merchandise Web Store

**Project Overview:** PitStop Gear is a simple online merchandise store dedicated to Formula 1 fans. The web application allows users to create accounts, browse products, and leave reviews on their favorite F1 gear.

## Project Objectives:

- Develop a functional and visually appealing web application for browsing and reviewing F1 merchandise.
- Implement and demonstrate at least three database operations.

## Technologies Used:

- **Frontend:** HTML, CSS, JavaScript
- **Backend:** Node.js with Express.js framework
- **Database:** SQLite

## Main Features:

- User registration and login system
- Product catalog displaying F1 merchandise (shirts, caps, etc.)
- Ability to add, view, and delete product reviews
- Responsive layout using Bootstrap
- Simple and intuitive navigation system

## Future Improvements:

- Add a shopping cart system
- Implement payment integration
- Add an admin dashboard for managing products and reviews
- Include product categories and search functionality
